Mode Button
Two operating modes available
AUTO and MAN(manual)

Press and hold mode button
for (3) seconds to switch
between AUTO and MAN

Description of mode level
functionality outlined below

Press LED or Mode button once to view current level settings on screen
Press LED or Mode button again while level settings are displayed to change setting(s)

Once in Manual Exposure Mode press MODE button to adjust exposure setting.

Manual Mode has 10 settings with 1 being the dimmest and 10 the brightest.

When system is powered off/on MHDV handle will remain in whichever *mode* is currently selected.

However, the Manual Mode level setting will default to level 1
when switching between AUTO and MAN modes.

However, the Manual Mode level setting will default to level 1
when switching between AUTO and MAN modes.

Monitor Interface Layout

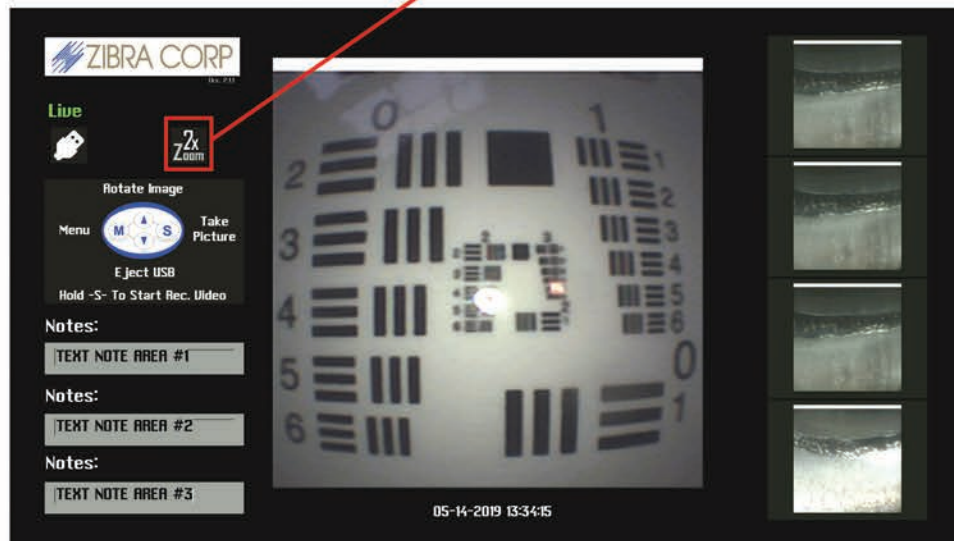

The Milliscope HD/HDV/HDX contains an integrated firmware system that allows you to use any High Definition compatible external monitor as your display.

Since the software and display characteristics are built directly into the camera system, the information will display correctly with minimal setup required.

Instructions for setting Milliscope HD/HDV/HDX system *Digital Zoom*

System set at 2X zoom(recommended for most applications)

Step 1: Press *Menu* button on front of Milliscope HD base unit

Step 2: The Mode Menu will appear and Set Zoom will be highlighted in white

Step 3: Press *Select* button to choose desired magnification

2c. Battery Power Indicator and Restart Function

To check the power status of the portable Milliscope HD base unit without removing the battery, firmly press button (circled above) on front of base stand. The indicator lights visible on the bottom of the unit(see below) will light to show charge status.

Please be aware that the system battery will automatically enter a *power off* storage mode if it does not detect a power draw for more than fifteen seconds.

If this occurs and your MHD system will not power on normally, firmly press the battery indicator/ restart button on base unit stand. Your system will now power up normally.

2d. Ready for use

The #51122 portable base unit and 7" video monitor system is assembled and ready for use. Please consult the Milliscope HD/HDV/HDX Modular Fiberscope/ Videoscope User Manual V1.03 for all other system usage instructions.
Thank you!

General Operating and Maintenance Information

- Always place and keep *Milliscope HD* unit on a flat, level, and secure surface.
- In the event of suspected damage or failure, do not operate. Have the device inspected by qualified personnel.
- Do not operate this product if there are signs of tampering or any of the covers are removed.
- Do not allow spilling of liquids on the *Milliscope HD unit*.
- *Do not immerse any of the components in liquid.*
- Do not operate the device outside of the specified input voltage range.

CLEANING

- Use a lightly damp cloth to wipe down exterior of unit. Allow unit to dry before use.
- Use Isopropyl alcohol and a soft, clean wipe or cotton swab to clean optical surfaces.
- Contact with acids and strong solvents should be avoided as serious damage can result.

Warranty Statement

Zibra Corporation certifies that all our factory borescopes and accessories will be free of defects in materials and workmanship for one year from the date of first retail purchase.

Video, lighting and some accessory products are covered by and subjected to the terms of the manufacturer's warranty.
